

Barostim

HEART FAILURE PATIENT GUIDE

“
I’m back to walking three
to four miles a day

- KEVIE, IMPLANTED WITH BAROSTIM IN 2018

Get Back to Doing the Things You Love.

Barostim™ is an option to treat your heart failure symptoms that has been proven to significantly improve your quality of life

BAROSTIM™

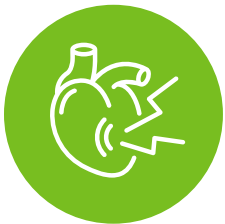

How It Works

Barostim is a pacemaker-like device designed to stimulate baroreceptors - natural sensors in your body that tell your brain how to control your heart, kidneys and blood vessels.

These combined effects reduce the heart's workload and help it pump more efficiently, helping to relieve the symptoms of heart failure.

Can You Get Barostim?

You have been diagnosed with heart failure and your heart has an “ejection fraction” of 35% or less

Despite the drugs that you receive, your symptoms significantly impact your daily life and reduce the activities that you are able to do

You are receiving heart failure drugs prescribed by your cardiologist

You are not indicated for Cardiac Resynchronization Therapy (CRT)

Why Choose Barostim

Proven and Approved

Barostim was FDA approved in 2019 after being proven safe and effective in a large randomized clinical study. It is the only therapy that uses the power of the brain to treat heart failure symptoms.

Safe and Simple Procedure

Barostim is implanted inside your body in a simple procedure that typically takes less than an hour. You'll probably go home the same day. Once implanted, you'll only need to visit your doctor for routine check-ups.

When Drugs Aren't Enough

Barostim is a new approach to treat your heart failure symptoms when your drugs are not enough. Barostim works without you knowing or doing anything, using the power of the brain to control your symptoms.

Patient Outcomes

Barostim has been shown to safely reduce symptoms of heart failure and improve quality of life

83%

Walk Farther¹

Patients that improved their exercise capacity in only 6 months

78%

Feel Better¹

Patients that reported a significantly lower impact of symptoms on their daily lives

65%

Heart Failure Class Improvement²

Patients whose symptoms improved at least one whole heart failure class (out of four) according to their doctor

Barostim is not right for everyone. Talk to your doctor about risks, benefits and expectations associated with Barostim therapy. Risks associated with the surgical implant procedure are similar to those from implanting a pacemaker. Patients implanted with the device are anticipated to be exposed to operative and post-operative risks similar to related surgical procedures involving the neck and chest. For a complete listing of all risks and benefits, please visit www.cvr.com/benefit-risk-analysis

Each story represents a unique individual experience and does not provide any indication, guide, warranty or guarantee as to the response other people may have to CVRx® technologies.

CAUTION: Federal law restricts this device to sale by or on the order of a physician.
